Winter, H. and Meckelburg, H.
RESEARCH ON THE ADHESIVE BONDING OF STEEL.
[1963] [34p] (figs omitted) 10refs
Order from SLA \$3.60

63-20346

Trans. of der Stahlbau (West Germany) 1961 [v. 30]
no. 1, p. 16-23.

DESCRIPTORS: *Steel, *Bonding, Adhesives, Stainless
steel, Surface properties, Mechanical properties.

The results of the investigations show that a successful
adhesive bonding of steel is feasible. The knowledge
and experiences gained in aluminum-bonding are
applicable. However, different characteristics of
material and other application procedures will add new
factors. For example, the spraying with blasting
corundum by the "Vacu-Blast" method can be regarded
as a most effective pretreatment of adherend surfaces.

no. 5, p. 129-136.

DESCRIPTORS: Supports, *Structures, *Structural
shells, Cylindrical bodies, Mechanical properties,
Mathematical analysis

The special position which the cupola with its particularly favorable static properties holds within the order of our supporting structures is shown. These properties together with the principle of utilizing material as fully as possible regarding the tensions by avoiding great slimmesses leads away from the homogeneous shell to the divided shell. The geometric and kinematic questions which arise are indicated. For demonstration (Mechanics, TT, v. 11, no. 4) (over)
